

**MAJOR COMPANIES IN THE FIELD OF ELECTRICITY  
THERMOSOLAR ASSOCIATED IN PROTERMOSOLAR, APPRECIATES  
POSITIVELY THE DRAFT FUTURE OF THE ROYAL DECREE GOVERNING  
ACTIVITY OF PRODUCTION OF ELECTRICITY IN SPECIAL REGIME**

The Asociación Solar Termoelectrica (Protermosolar), which brings together the major companies in the field of electricity thermosolar, appreciates in overall the draft Royal Decree to regulate the activity of electric power production in special regime and certain facilities technologies similar ordinary regime, which will replace the existing RD 436/2004.

Protermosolar highlights measures to ensure profitability of the facilities generating electricity from solar power, proposing a new mechanism that binds the IPC retributive updates to the fee and the premium reference. It also welcomes the confirmation of the expansion of objective of installed power of 500 MW reference, although it is estimated still insufficient.

The scope for improvement, which should be considered Protermosolar seen more favourable treatment for facilities small power (parabolic discs), similar to that applicable to photovoltaic systems up to 100 kW. Equally considered necessary clearer wording of the procedure revision of rates, premiums and additions from the year 2010, establish clearly the non-retroactivity of these revisions, thus ensuring the stability of the payment framework.
